INTRODUCTION

Reynaers is a well established and very successful business that has grown steadily year after year. This success is no accident; it is the direct result of combining reliable, top quality products and an exemplary focus on customer service.

Through decades of experience of working with architects and contractors, we have a thorough understanding of your business needs.

We know, for example, that when you ask for a quote, you want it quickly, and it needs to be accurate in every detail. When you ask for a product sample, speed of delivery is once again vital. It needs to look perfect, so you will not hesitate to show it to your clients. When you access our website, you need to be able to find the CAD drawings, BIM product models and technical information you are looking for quickly and easily.

At Reynaers, we have a dedicated team of experienced professionals who are committed to delivering the very best levels of customer service to every architect, for every project, regardless of whether it is a single window or a house full of windows and doors.

Our aim is to ensure that once you have experienced working with Reynaers, you never have reason to look elsewhere ever again.

REYNAERS

For 50 years, Reynaers has been designing cutting edge glazing solutions for some of the most iconic buildings in the world. Engineered without compromise, our range of aluminum glazing products is specified time and again by the world's leading architects and construction companies.

Reynaers is dedicated to providing the discerning North American homeowner with the very best products, combining style and performance without compromise.

DESIGN STATEMENT

There is a growing demand for homes that are flooded with natural daylight, homes that have large expanses of glass providing unobstructed views, homes with huge sliding doors that open up the house and blur the divide between home and garden.

The slim frame profiles and great structural integrity of our windows and doors make it possible for us to offer industry leading maximum sizes, keeping the number of profiles to a minimum and maximizing the glass area.

These same benefits mean that aluminum is a very versatile frame material that is equally suited to both contemporary and traditional properties. A modern glass extension, for example, can both contrast and complement the style of a traditional property, and we have windows that replicate the sightlines of old steel windows. For a more adventurous contemporary design, the versatility of our products and the support of our skilled technical team mean the glazing can become a feature of the property rather than just a functional necessity.

TECHNICAL SUPPORT

Our team of experienced technical experts is on hand to answer your technical questions and to provide whatever support you need to be able to complete your specification quickly and with the minimum of fuss.

As you would expect from an established and respected company, there is a comprehensive set of technical literature available for you to browse online and download. Whether you need a full technical catalog, a short technical summary sheet, case studies or photographs, you will find everything you need on our dedicated extranet site. Naturally, there is a comprehensive set of CAD drawings available to download too.

DEMONSTRABLE QUALITY

Once you have specified Reynaers products, of course, you need to have confidence that your clients will be delighted with your recommendation.

Reynaers can provide you with a consumer brochure that you can present to your clients. It is designed to convey a premium brand positioning, presenting the product range and its benefits in a simple, non-technical way.

Often, your clients will want to see a product or a sample of a product, and here too we are ready to help. A complete range of product samples is available - from corner samples to whole window samples. We can supply color swatches too, helping your clients to choose from the hundreds of finishes that are available.

^{*}High-insulation variants of these products are also available.

WINDOWS AND DOORS

Our range of four different window and door systems is designed to ensure that there is a product for every requirement. We have products that carry the AAMA accreditation, products that meet the Passive House standard, products designed to withstand extreme wind loading and products with exceptional acoustic performance.

Different styles are available to ensure the windows and doors match the style of the building.*

Slim Line

Functional

Hidden vent

^{*}Available styles depend on the system chosen.

LIFT & SLIDE PATIO DOORS

Huge unobstructed glass areas and an effortless sliding mechanism combine to make our sliding doors the perfect solution for rooms with a view. Designed with security, insulation and noise reduction in mind, these low maintenance aluminum doors offer state-of-the-art performance and stunning aesthetics.

Reynaers offers a comprehensive range of sliding doors, specific to your exact requirements. Choose sliding doors with single, double or triple-track designs; slim-line options; slide or lift-and-slide mechanisms; manual or automatic operation.

Finish off any room with our sliding doors' corner solution, opening up gorgeous unobstructed views without corner profiles in the way!

Flat Bottom

Low Threshold

CF 77

Double Weather Seal

High Performance

BI-FOLD DOORS

Bi-fold doors can transform an ordinary room to make it a feature of the house, opening the interior to the garden and letting the outside in. An innovative and modern statement, our aluminum doors are available in large industry-leading sizes to maximize aesthetics.

Our bi-fold doors feature four different threshold options, from flat bottom to high performance, and there is also a slim-line variant with narrower door-leaf profiles. Multi-track & pocket solutions are also available.

With built-in security and weather features that meet or exceed relevant standards, choose from a comprehensive range of designs that use between two and eight door panels. Have the doors open in or out, stack to one side, or stack to both sides. The possibilities are endless.

H FINITY

Hi-Finity handle Hi-

UNIQUE SLIDING DOOR HI-FINITY

The current trend in architecture is "more light through bigger glass surfaces". With this idea in mind, Hi-Finity was designed to accommodate more illumination and high performance. The large glass surfaces reach from floor to ceiling, inviting maximum daylight into the house. The specific character of Hi-Finity sliding doors is expressed by its unique handle, which has a slim, elegant and streamlined appearance.

Thanks to Hi-Finity, the user can now enjoy an infinite view with ultimate performance.

CURTAIN WALLING

Reynaers offers a comprehensive range of curtain wall with the ability to specify each product to meet your exact requirements.

 ${\it Choose \ a \ capped \ or \ structurally \ clamped \ system \ to \ enhance \ the \ facade \ of \ your \ building.}$

High performance upgrade options will allow triple-glazed units up to 2 1/2" thick to be incorporated. Freedom of design is almost guaranteed by the fact that such large panels of glass can be incorporated into any building. Where there is a requirement of opaque or colored glass or even solid panels, Aluminum Curtain Walling can offer it all. Aluminum has the perfect properties to meet the needs of Curtain Walling.

Mosquito Brise Soleil Ventalis

COMPLEMENTARY SYSTEMS

There are a number of other complementary products in our range, which include the following:

- Mosquito is a wire mesh fly-screen system that is compatible with all of our windows, doors and sliding patio doors, available as both interior and exterior*.
- **Brise soleil** sun shading systems can comprise louvers made from aluminum or glass, and can even be combined with solar photovoltaic panels.
- Ventalis is a self-regulating ventilation system that can be incorporated into the top frame of
 our windows and doors. Manually adjusted to offer five levels of ventilation, the self-regulating
 system is designed to keep the airflow constant with changes in wind pressure outside. The
 ventilation units are both insect repellent and rainproof, and are cleverly insulated to minimize
 the risk of condensation.

^{*}Depending on configuration.

Exclusive Purity handles

For window

For door

For sliding door

HANDLES AND FINISHES

We have developed an exclusive range of Italian-designed handles called Purity. This suite of handles can be used across our range of windows, doors, sliding patio doors and bi-fold doors, giving consistency of color and style in every room. Made from a new alloy that offers extreme resistance to corrosion and coated using a new production process called BIOV (Bioecologic Ion Overlay), these highly durable handles are available in a range of eight different colors.

There are also literally hundreds of finishes to choose from: a huge range of RAL colors in a choice of gloss or matte finish, metallic colors, textured metallic finishes, wood-grain finishes and anodized options too. Of course, you can also have a different color inside and out.

CREDENTIALS AND ACCREDITATIONS

Reynaers products have been specified in some of the most iconic buildings around the world. All our products are thoroughly tried and tested, earning Reynaers an enviable reputation of excellence among the worlds leading architectural practices and construction companies.

Reynaers is a well established and professional global organization. Our product range has been independently tested to meet and often exceed the requirements for a range of North American, British and European standards. Furthermore, Reynaers is proud to have been awarded a number of more general accreditations, including ISO 9001:2000, ISO 14001, ISO 16001, ISO 50001.

Reynaers products are available through a network of carefully selected dealers. All have demonstrated an exceptionally high level of customer service, and understand the demands of supplying the discerning home owner at the premium end of the market. All have been thoroughly trained by Reynaers and all have agreed to work to the stringent Reynaers code of conduct:

Trust

- . Be polite and courteous to customers, their family and friends at all times
- · Answer any questions honestly and to the best of your knowledge
- · Never mislead your customers or avoid the truth in any way
- Respect a customer's right to end a conversation at any time
- Never take advantage of a person's inexperience or vulnerability

Professionalism

- Be fully trained and competent to complete any service you offer in a correct and professional manner
- Dress intelligently
- · Always clean up after yourself at the end of the day
- Treat every customer's home with care and respect
- Put down dust-sheets, and make every effort to minimize mess

Lawfulness

- Always act within the law
- Always work in accordance with all relevant regulations and standards
- Ensure that customers are aware of their legal rights with regard to any contract that they sign and understand what they are committing to

Safety

- Follow all appropriate measures to ensure that all work is carried out safely and that any possible risk to the home and to any people in the vicinity is minimized
- Be suitably trained in the operation of all tools and equipment used
- · Always have available, and make use of, the necessary health and safety equipment

Fairness

- · Have a clear and equitable complaints policy and procedure
- · Take every reasonable measure to ensure that all customers are completely satisfied

This code of conduct is designed to ensure that every customer is treated in a professional manner and receives impeccable service.

A number of our dealers will have a showroom that will be available to you and your clients.

ENVIRONMENTAL

Reynaers has an unwavering commitment to our environmental responsibility.

Aluminum is a material that is 100% recyclable without loss of quality. Not only does this mean that we can supply aluminum windows and doors with a high recycled content and guaranteed quality, but it also means that these same products can themselves be recycled at the end of their lives.

Our products are also designed to offer industry-leading levels of thermal performance. Clever design and state-of-the-art thermal breaks help keep heat loss to a minimum, meaning more efficient glazing and lower energy bills for the home owner.

At Reynaers, we recognize that our business activities impact on the environment in a number of different ways, and we are committed to reducing these where possible. In order to achieve our commitment, we have developed and implemented an Environmental Management System that meets the requirements of ISO 14001. This is subject to a regular independent review and audit to ensure that there is effective environmental management at our organization.

"When I specify
Reynaers, it's one
less thing I have to
worry about. The
product spec is
always high, and I'm
always impressed by
their knowhow and
technical expertise."

At Reynaers, we constantly seek to develop and improve our products and service for our customers, and therefore, reserve the right to amend our product specification from time to time. The photographs in this brochure show Reynaers products, which may occasionally differ in detail and appearance from those we currently sell.
